

The Madison Community Foundation encourages, facilitates and manages long-term philanthropy. It focuses its efforts in Dane County, Wisconsin, but charitable distributions are made throughout the United States. The community trust has grown since its creation in 1942, with more than \$400 million in total assets.

- Aim for consistent returns through all market cycles
- Utilize the power of diversification to achieve higher returns with lower risk

On an annualized, net-of-fees basis, the return on the Fund over the long term (at least a full market cycle) will be expected to: 1) Equal or exceed the spending rate plus inflation over a market cycle; and 2) Equal or exceed the average return of appropriate capital market indices weighted by the asset allocation target percentages over rolling five-year periods.

Performance goals are based upon a long-term investment horizon; therefore, interim fluctuations should be viewed with appropriate perspective.
